

## CIS 3270 Assignment #1: First Java Program

**Due Date:** August 28<sup>th</sup>

### Instructions:

1. Download JDeveloper 10.1.3 (you may skip this if you choose to use other IDEs)
  - o Go to <http://www.oracle.com/technology/software/products/jdev/index.html>
  - o Choose JDeveloper 10g (Jan 2006). You may need to register first (free registration).
  - o Choose “J2EE Download” → “Complete Install” (240M).
  - o Follow the installation guide (section 1 and 2)  
<http://www.oracle.com/technology/documentation/jdev/1013install/install.html>
  - o Follow the first step tutorial to get familiar with JDeveloper (about 20 minutes)  
<http://www.oracle.com/technology/obe/obe1013jdev/introide/introjdevide.htm>
2. Create your first Java program to print your own name on the screen. Take a complete screenshot of the developmental and running screen (press the “Print Screen” button on your keyboard), and paste it in a MS Word document (see a sample screenshot below).

**Submission:** one page print-out of the screenshot. **Note:** the screenshot needs to be complete and original, no image editing. This applies to all future assignments.
